

Pressure Song - English @ Physics

If you walk into the snow
You can soon feel how
Pressure works on the floor
And you will sink like an ore

A | F | G | A - Asus4

Verses 1 & 2

When I am underwater
I got the pressure
I think I hear a laughter
I turn around and see a flounder

When something falls into the water...
We talk about pressure
The force and the area are like
A column into the water,

D | A | Em7 (022033) | F - G

Chorus

When something falls into the water...
We talk about pressure
an object into a river...
And that's the pressure

A sad thing happened to the titanic
To dodge the iceberg he made the wrong pic
When he sank down you'd still hear music in the hall
While water poured through the big hole

Verse 3

Chorus

When two metal cups
that fit together
You can't pull them apart
even if you're the strongest

Verse 4

Chorus
